# Hack4.Good

## CERTIFICATE OF PARTICIPATION

### Luca Brillhaus

participated in the Hack4Good programme from **October 6 to November 23, 2023.**

Hack4Good is an 8-week long pro-bono programme that matches data science talents from universities in Zurich with non-profit organisations that promote specific UN Sustainable Development Goals. In close collaboration with these organisations, teams of four students develop and implement data-driven solutions to increase these organisations' impact in society. The programme is organised by the Analytics Club at ETH.

Through workshops and hackathons, the participant had the opportunity to learn about agile project management, the workflow in data science, social impact and pitching.

Specifically within the programme, the participant has developed a solution in collaboration with our partner

## BASE

Create a pipeline including web scraping and aggregating information (using LLMs) relevant to energy servitization.

Zürich, 23.11.2023

Marco Magno
President of the Analytics Club at ETH
